

TeSys H

Ultra-compact starters

Presentation

A3/2

Ultra-compact 22.5 mm motor starters - TeSys H

Type of product	Range		Page
Ultra compact starters IEC ratings Standard starters, screw or spring terminals, direct-on-line or reverse Safety starters, screw or spring terminals, direct-on-line or reverse	Up to 3 kW AC53a Up to 9 A AC51		A3/6
Ultra compact starters UL ratings Standard starters, screw or spring terminals, direct-on-line or reverse Safety starters, screw or spring terminals, direct-on-line or reverse	Up to 3 hp AC53a Up to 9 A AC51		A3/7
Circuit breakers for a group of starters Selection of magnetic motor circuit breakers GV2L – rotary knob GV2LE – rocker lever	Up to 32 A		A3/8

Technical Data for Designers

A3/9

The most compact 3 KW / 400 V starter in the world

Up to 75 % of space reduction

- Ultra-compact 22.5 mm starter
- Reversing starter in the same width
- Maximum space savings for group starter architecture

Long electrical durability

- Suitable for high demanding application
- 30 000 000 of AC53a electrical cycles

> With printed QR code, referring directly to the product data sheet.

Easy Design

- Wide range setting motor protection
- Automatic, manual or remote reset after thermal trip
- Wide range of control voltage

Easy to integrate

- Direct mounting installation on DIN rail
- Control terminals on the upper side
- Power terminal on the lower side

Ultra-compact starters

TeSys H

Standard version

- 2 ratings:
 - 2.4 A 400 V AC53a
 - 6.5 A 400 V AC53a
- 2 control voltages:
 - 24 V DC
 - 110 V / 230 V AC
- 2 terminal types:
 - Screw clamps
 - Spring
- Can provide up to 3 functions:
 - Forward running
 - Reverse running
 - Overload protection

TeSys H

Safety version

- Safe Torque Off embedded:
 - SIL3 according to IEC61 508-1
 - Ple according to ISO1 3849-1
- ATEX:
 - As associated devices for motor protection

TeSys H is a solution dedicated to low footprint applications, in industries as food and beverage, logistics, and durable goods.

Conventional.....OR.....TeSys H standard solutions

Direct-on-line

Reverse

> How does the hybrid technology work ?

Hybrid technology:

Each contact is coupled with a power semiconductor for switching

> Higher number of on/off switches, extended durability.

> Closing

Start: conduction through the semiconductor.

Contact closure under zero voltage. No electrical arc: the contact is preserved.

The semiconductor is non-conducting.

> Opening

Before the opening of the contact the semiconductor is triggered.

Contact opening: - no arc: the contact is preserved.

Stop: the semiconductor becomes non-conducting.

Ultra-compact starters TeSys H

Conventional OR TeSys H safety solutions

TeSys H

TeSys H Safety

- Immediate respect of the highest safety standards
- Simplified design of your safety electrical architecture
- Quicker panel implementation
