

RMS VPN

Secure your remote infrastructure quickly and easily with robust VPN connections – no extra management or servers needed. We'll take care of the complex configurations in the background.

A SINGLE, COMPREHENSIVE VPN SOLUTION

24/7 on-demand service with dedicated servers around the world

Key VPN services support, including OpenVPN

Comprehensive user activity reports

Easy end device access & control, including 3rd-party devices and client application

Automatic client configuration & synchronisation

Simple management of unlimited clients

VPN Hub

Comprehensive and customisable VPN hubs for secure remote infrastructure access.

VPN Quick Connect

Simplified, under-the-hood VPN configuration with minimal input and maximum security.

Companion app

Mobile app for easy access to your key RMS VPN functions, including VPN Hub, Quick Connect, and more.

Pricing

The first 5 GB of data for every company on RMS are free of charge! After that, this service is available on-demand in either a 10-year, 150 GB package assigned to a single device, or via credits worth 2 GB each, assigned to an RMS company
